

TELEK PAPRIKA

MARTONOS

TELEK PAPRIKA

QUALITY AND RELIABILITY

- ✓ Leader in the Serbian herb processing sector
- ✓ One of the most significant dried herbs producers in Europe
- ✓ As much as 90% of our sales is realized in foreign markets.
- ✓ The company's main activity is the convective drying of herbs.
- ✓ The whole production process is carried out within our company - from primary agricultural production to final products.
- ✓ Our agricultural activity covers more than 900 hectares of our own land.
- ✓ Direct cooperation with reliable agricultural combines and farms
- ✓ Our annual production capacity amounts to 3,500 tons of dried goods
- ✓ All our products guarantee a high level of health and microbiological safety.
- ✓ A modern laboratory within our company carries out physico-chemical, microbiological, and sensory tests.
- ✓ Increased reliability of delivery in case of dry periods, as all crops are grown only under irrigation systems.
- ✓ Optimized raw material production technology, which has proven successful even in extreme climatic conditions.

*Dried culinary herbs
and vegetables*

DRIED PARSLEY LEAF

Dried parsley leaf is our company's best-selling product.

We only process classic flat-leaf parsley.

Our production capacity is 2,000 tons of dried parsley leaves per year.

We distribute leafy parsley in leaf fractions of 1 mm, 2 mm, and 4 mm.

We pack it in cardboard boxes or paper bags.

The final product is available throughout the entire year.

DRIED SPINACH

In the production process, spinach is processed first in the calendar year.

We only process the winter growing variety of spinach.

The production capacity is 500 tons per year.

We distribute dried spinach in the form of leaves or powder, in the leaf fraction of 4 mm and in the form of 200 µm powder.

We pack it in cardboard boxes or paper bags.

The final product is available throughout the entire year.

DRIED DILL

Dill is known as a spice and as a medicinal herb, used primarily by the spice and canning industry.

The production capacity is 260 tons per year.

We distribute dill in the form of dried leaves or stems.

We sell it in leaf fractions of 4 mm.

We pack it in cardboard boxes or paper bags.

The final product is available throughout the entire year.

GROUND PAPRIKA

Paprika was the first product with which we started our business.

Our area belongs to the same region as Szeged in Hungary, where high-quality paprika is produced.

Our production capacity reaches 600 tons per year.

In terms of quality, we offer paprika which has a range of 80 to 160 ASTA.

We pack paprika in paper bags of 20 and 25 kg.

Production and sales are carried out on the basis of prior agreement.

OUR PRODUCTS

DRIED PARSNIP

Parsnip is used as a food seasoning.

We produce up to 300 tons annually.

We sell dried parsnips in 10x10x2 mm cubes, in granules and in ground form.

We pack dried parsnips in paper bags.

The final product is available throughout the entire year.

DRIED CARROT CUBES

Dried carrot is the main ingredient in instant soups.

We produce around 80 tons annually.

We sell it in cubes of 10x10x2 mm, but we can also granulate it (granule sizes: 1-3 mm or 2-4 mm).

We pack it in bags.

The final product is available throughout the entire year.

DRIED BEETROOT POWDER

Dried beetroot serves as a natural colorant in the food industry (mainly in the meat industry).

The annual volume of production is 40-45 tons. We sell beetroot in powder form (200 µm), but we also offer it in cubes of 10x10x2 mm.

We pack it in bags or cardboard packaging. The final product is available throughout the entire year.
